

Shoulder of the Green Chart

Please note not to scale

The line your bowl takes does not vary, be it a long jack or a short jack, but the breaking point does.

The Formula is:

Once you know the line, your bowl takes to return to the centre line, the break point is two thirds of the distance between mat and jack.

New bowlers and social bowlers aim to let your bowl finish no more than 1m around the jack, the more experienced and competition bowlers your aim is within 24" of the jack, we call this mat length or MT.
